

Air purification that meets the most demanding standards: yours.

The PuriFi whole-home air purification system operates until sensors verify the air is purified and within the air quality level you choose.

See back for more details.

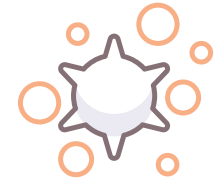

It's like having an on-demand health check for the air inside your home.

PuriFi continuously measures and monitors your indoor air, responds to changes, and verifies the air is pure.

PuriFi

The science of real-time
air and surface purification.

*To view test reports on specific contaminants, environmental test conditions, and performance levels of PuriFi, please visit: PuriFiLabs/test-reports/. Actual results may vary based on environment and occupied space.

Inactivates
up to 99.99%
of tested viruses
and bacteria*

Reduces
allergens,
including pollen,
dust, and
pet dander

Neutralizes
odors, smoke,
and mold
