

PuriFi

**For every
gallon
of water
you drink,
you breathe
8,000
gallons
of air.**

**If purified
water
is better
for you,
why not
breathe
purified
air?**

**PuriFi neutralizes up to 99.99% of
tested viruses and bacteria* from
the air in your home's breathing zones.**

See reverse side for details. →

The whole-home air purification system that proves its performance.

PuriFi continuously measures and monitors indoor air, responds to changes, and verifies your air is pure.

If you're not fully satisfied after 90 days, PuriFi will provide a full refund.

PuriFi

The science of real-time air and surface purification.

See, feel, and smell the clean air difference.

"We feel that we're living in the cleanest air we've ever lived in."

Mark Nemschoff

"We had air purifiers in every room and they didn't do the job that this has done for our house."

Ann Mintman

"Food smells, I love to cook. So a lot of those smells, you will notice them immediately like usual, and then within a few hours everything is gone. It's pretty incredible."

Julie Simpson

"I can only imagine what this could do in other people's homes and how it could help them out."

Elaine Weakland
