# Proof. Not Promises.

PuriFi continuously measures and  
monitors your indoor air, responding to  
changes, and verifying your air is pure.

PuriFi inactivates 99.99% of tested viruses and bacteria,  
effectively neutralizing odors while driving aerosols and  
particulates such as pollen, dust, and mold spores out  
of the breathing zone in every room of your home.

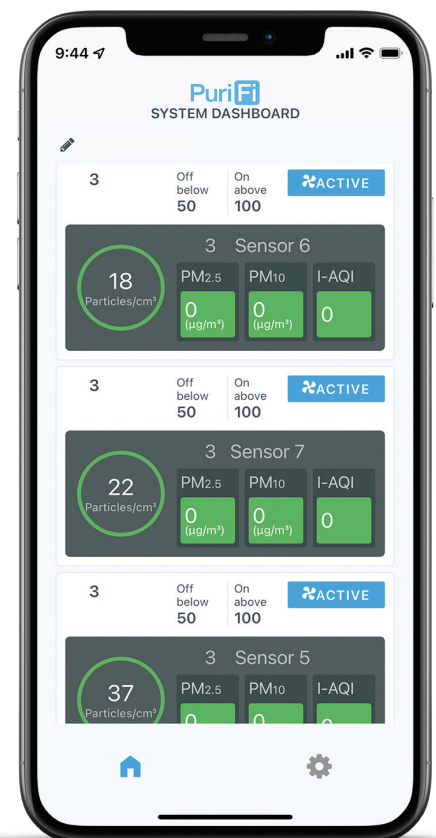

The science of real-time  
air and surface purification.

Before and after results from a recent PuriFi installation.
